

FIRST MIDTERM MOCK EXAM - SAMPLE 5

Apellido y Nombre: _____ DNI: _____ Curso: ____ Fecha: __/__/__

a) Read the text carefully and complete the blanks. For blanks 1 to 5, choose the right verb form. For blanks 6 to 10, choose the right connector. (3 points each) _____/30

The discovery of Botox

Back in the 80s, Vancouver doctors Jean and Alastair Carruthers ¹ **accidentally discovered / was accidentally discovered / were accidentally discovered** cosmetic properties in a toxin that ² **normally used / was normally used / had normally used** by ophthalmologists. The couple's discovery had an impact on the cosmetic procedures that doctors ³ **did / was done / had done** so many times before. Soon, the face of beauty became a billion-dollar industry.

In 1987, Alastair ⁴ **was divided / had divided / divided** his Vancouver dermatology practice between surgery for skin cancer and cosmetic procedures. He shared his office with Jean, an eye doctor who ⁵ **had treated / was treated / treated** pediatric disorders as well as adult conditions such as blepharospasm. This condition, which produces an uncontrollable spasming of the eye and surrounding area, was treated with a dilute solution of botulinum toxin. ⁶ **When / Before / Besides** it was injected into the skin, it temporarily paralyzed the spasming muscles.

One day, by Jean's account, one of her blepharospasm patients became furious ⁷ **before / as / so** her forehead was not being injected. She didn't have forehead spasms; ⁸ **however / therefore / also**, she wanted to have the toxin injected in that part of her body. Jean was surprised and curious. ⁹ **However / After / Therefore**, she asked her patient why she cared. ¹⁰ **So / Because / Therefore** my wrinkles disappear when you inject my eye-muscles," the patient said.

Glossary:

Blepharospasm: espasmo

Surrounding: alrededor

Forehead: frente

b) Make Wh- Questions about the following extract. Underline the answers in the text. (7 points each) _____/35

After **William Morton**, Wells' former partner, had successfully demonstrated some results with ether anesthesia, Horace Wells began self-experimentation with **nitrous oxide, ether, chloroform, and other chemicals** to test their comparative anesthetic properties. Therefore, his personality was radically altered as he was **frequently inhaling chemical vapours**. What's more, he was taken to prison in New York City for throwing acid at two women under the influence of drugs. There, in a prison cell, he took his own life. At the time of his death, he did not know that the Paris Medical Society had started to acclaim him as the discoverer of anesthetic gases.

1. Who

2. What

3. Why

4.

5.

c) Express yourself: Choose ONE of the topics below and write a 4-sentence paragraph. Include at least two elements from each column below. _____/35

...find/s it... to	after
